DETAILED ACTION

Specification

1. The disclosure is objected to because of the following informalities: The list of references on page 12 should be removed; on page 7 line 13 after housing "G" should be --housing 6--. Appropriate correction is required.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 21-39 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 is indefinite because it is unclear if the shaft element of line s 9 and 10 is the same shaft element of line 4.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 21-39 are rejected under 35 U.S.C. 102(b) as being anticipated by Bachman (US 2,579,642), as best understood.

Bachman discloses a device comprises a drive element (30), wherein a stroke movement of a shaft element (15) and subsequent rotation of a carrier element (27) are

performed by means of the drive element (30) in an actuation device, the shaft element (15) being axially and rotationally decoupled from the carrier element (27), the actuation device having a housing (10), and an actuator element (22) with an element (24) connected to its front surface being inserted within the housing (10).
